**(54) PRODUCTION  
AND USE OF  
MEDICINAL PACK  
AGENT CONSISTING  
OF TEA LEAF FINE  
POWDER AND  
EXTRACT OF  
POWDERED TEA OR  
TEA AS MAIN  
COMPONENT**

(57) Abstract:

**PROBLEM TO BE SOLVED:**

To obtain a medicinal pack agent extremely excellent in aging resistance of skin cells, and removing action of old keratinous cell fragments of skin and a soil.

**SOLUTION:** This medicinal pack agent consists of a plant tea leaf fine powder and an extract of a powdered tea and a tea as main components, and is blended with a thickening agent, a moisture keeping agent, etc. The above medicinal pack agent is an excellent pack agent since the tea components affect skin, and effects thereof are as follows: an antibacterial and antiviral activities, a moisture

keeping and blood flow  
accelerating effects, a  
removing action of old cell  
fragments and a soil on skin, a  
smoothing activity for an  
aging resistance of skin, and  
an anticancer activity.
